Summary

Game development passionate CS student eager to learn more about the videogame industry and its processes. I like to build things, and I consider myself a very creative and restless person. I love good design and ellegance in all things I put my mind and skill to. I've participated in numerous Hackathons and I've been to a great deal of Game Jams, and did numerous side projects on my own as well. I love working with proactive and creative people and also sharing cool ideas with them. My biggest flaw is that i need to feel part of what I'm building to pour my 100% into a project.

For more information, my LinkedIn[1] and my Portfolio[2] can be checked out.

Work Experience

Present **June 2018**	Java Developer
	E-TIC Sistemes
	I'm currently working as a junior developer for e-tic sistemas at Grupo Godó. My responsibilities here are working on the editorial software Mundo Deportivo's writers are using, based on Java7.

Feb 2018 **Feb 2018**	Unity3D Teacher
	Video Games Association of the FIB
	Teacher at a course about advanced topics for Unity. Several subjects were taught, including shader development, serialization, optimisation, game design, multiplatform development, etc.
